

# Ritornello

## RITORNELLO

### Musical Device for Inner Exploration

Ritornello is a musical device designed to help you navigate your inner space for self-revelations. By entering a deep state of trance while solving the included puzzle, a localized singularity will be created, allowing you to reset and reconfigure your perspective. Contact with the device and the puzzle contained within is transformational in itself.

#### CONTENTS

- 1 Board
- 4 Cards
- 4 Puzzles
- 1 Usb Key

#### Instructions:

Set time aside to absorb the whole experience. Start by inserting the USB KEY in any compatible device. Play the Album and place the board in front of you.

Place the 4 cards on the empty slots in the Board in their correct order. To reveal the puzzles simply turn the cards around in place. Card 1 is a codex that will allow you to solve some puzzles, Card 4 has a QR code that will allow you to access a terminal to input your data.

The puzzles are connected and will require you to interact with the artwork, the music and with an internet connected Smartphone. We recommend turning your phone sideways for best results.

There is a reward for whoever solves the puzzle.

Good Luck!!!
